... fact, they won't even have to think twice about getting a dish, because every **home** built by The Jones Co. after Jan. 1 comes with a pre-installed Digital **Satellite** System dish.

The program is called ' **Home** Systems 2000,' and it represents a large jump from the current standard of **pre - wiring** for two or three cable outlets and several telephone jacks as a bow to technology...

...that precludes the need for cable in most of the areas where Jones is now **building**, Systems 2000 includes a full security system and **pre - wiring** for six two-line telephone jacks (including a jack wired specifically for integrated services digital network), six cable outlets, a second **satellite** receiver and six surround-sound speakers for a **home** theater. The cable outlets can be used for cable or to spread the satellite signal...

...he's heard of a builder automatically providing a dish as part of the new **home** 's cost. However, he'd prefer to hear that customers are being given a choice of programming, and that the hardware is the second step.

'If I go in to **pre - wire** a **house** for **satellite** communications, it's all generic. It's the dish and the box that sits on...nothing. It keeps you in touch with local events and gives you cable throughout the **house** with no equipment to maintain.'

But Polizzi can think of very few situations where 'his' **satellite** -owners would need cable at all. He thinks that most of them will end up using the **pre - wired** cable outlets to distribute the **satellite** signal.

Tele-Communications Inc.'s recently announced 'Cable Plus' may provide the answer: a combined **satellite** -cable package offered by the same provider. MCN

DESIGN OF SATELLITE CONTROL FACILITY, TECHNICAL SUPPORT FACILITY, AND ALTERATION OF OPERATIONAL SUPPORT FACILITY, FALCON AFB LORADO SOL DACA45-96-R-0028 POC

For further information, Contact Larry Sand at (402) 221-4595. CONTRACT INFORMATION: Types of services required will include surveys, site investigations, concept design, final design (option), and construction phase services (option). A Fixed Price Contract will be negotiated for these services. Estimated completion date is October 1997, with an anticipated start date of June 1996. The Omaha District will establish a design partnership for this project. Prior to negotiation, the A-E will attend a one-day partnering meeting at the Omaha District offices to define Omaha District expectations of the A-E, create a positive working atmosphere, encourage open communication and identify common goals. Greater emphasis will also be placed on the A-E's quality control procedures for this project. The District will not review quality into the design. The A-E selected for this project must submit for approval a project-specific design quality control plan as a condition of contract award. This plan is not required with this submittal. If a large business is selected for this project, it must comply with FAR 52.219-9 regarding the requirement for a subcontracting plan on that part of the work it intends to contract. This plan is not required with this submittal. The subcontracting goals for this

contract are that a minimum of 53% of the contractor's intended subcontract amount be placed with small businesses (SB), including small disadvantaged businesses (SDB) and women owned businesses (WOB), 9% be placed with SDB, and 3% be placed with WOB. The on-site data gathering and charrette process will be used on this project. PROJECT INFORMATION: One A-E firm will be selected to design all three facilities concurrently. Satellite Control Facility: A new 31,000 sf, environmentally controlled **building** to support five Space Operations Squadron (SOPS) **satellite** control system missions. The **building** will include RFI shielding, raised computer floors, redundant utilities, **pre - wired** work stations, engineering **offices**, computer rooms/microcomputer lab, fire protection, and interior security features. The **building** will also include an enclosed walkway to other facilities. Site improvements will include sidewalks, a parking area, and complete landscaping. Technical Support Facility: A new 30,000 sf building to provide space for operations support staff and administrative personnel. The building will include raised computer floors, a pre-wired computer room, and a comprehensive interior design. The building will also include a fire protection system. Site improvements will include a new parking area, sidewalks, and landscaping. Add/Alter Operational Support Facility: Addition and alteration of approximately 12,000 sf for the existing Operational Support Facility to support additional personnel. The renovations include reconfiguring primarily administrative space to accommodate the larger staff as well as enlarging an existing dental clinic to 300 sf. Use of the metric system of measurement may be required for some deliverables under the proposed contract, however, metric system experience is not required for selection. The estimated construction cost is between \$20,000,000 and \$25,000,000. SELECTION CRITERIA: See Note 24 for general selection process. Criteria for selection, in order of importance, are: (a) Recent specialized experience and technical competence of the firm (including consultants) in: (1) Design of similar computer and communication facilities with raised floors and the associated computer/communications support features. (2) Design of RFI Shielding. (3) Producing quality designs as evidenced by the firm's quality control procedures. The A-E must be able to provide designs that meet guidance and criteria without detailed review by the District. (4) Effective coordination and management of the project team, including consultants. (5) Conducting design charrettes. (6) Construction cost estimating and preparation of estimates on IBM compatible personal computers using Corps of Engineers Micro- Computer Aided Cost Estimating System (M- CACES) GOLD version or similar system (M-CACES software will be provided). (7) Producing Computer Aided Drafting and Design (CADD) drawings fully compatible with Autocad version 12. (b) Professional qualifications and specialized experience in providing services similar to those listed above of the proposed team members (including consultants) in the following disciplines: Architect, Structural Engineer, Electrical Engineer, Mechanical Engineer, Fire Protection Engineer, Environmental Engineer, Civil Engineer, Interior Designer. (c) Capacity to perform the work in the required time. (d) Past performance as described in Note 24. (e) Location in the general geographic area of the project and knowledge of the locality of the project. (f) Extent of participation of SB, SDB, historically black colleges and universities, and minority institutions in the proposed contract team, measured as a percentage of the estimated effort. (g) Volume of DOD contract awards in the last 12 months as described in Note 24. SUBMITTAL REQUIREMENTS: Solicitation packages are not provided for A-E contracts. This is not a request for proposal. Firms desiring consideration shall submit two copies of a combined SF 255 and separate SFs 254 for prime and each consultant. To be considered, submittals must be addressed as follows: U.S. Army Corps of Engineers, Omaha District, CEMRO-ED-C, ATTN: John M. Miller, 215 N. 17th Street, Omaha, NE 68102-4978. Submittals must be received no later than close of business on the 30th day after the date of publication of this announcement. If the 30th day is a Saturday or

Sunday or a federal holiday, the deadline will be the close of business on the next business day. In block 10 of the SF 255, provide the following: (a) Design Management Plan (DMP). The DMP should be brief and include an explanation of the firm's management approach, management of subcontractors (if applicable), specific quality control procedures used and an organizational chart showing the inter-relationship of management and various team components (including subcontractors). (b) The firm's present workload and the availability of the project team (including consultants) for the specified contract performance period. (c) The firm's past performance and familiarity with the charrette process through use of in-house staff or consultant. In block 7 of SF 255 include team member's experience in participating on interactive conceptual design teams (charrettes). In block 3 of SF 255 provide the submitting firm's number (six or seven digits) assigned by the North Pacific Division, U.S. Army Corps of Engineers, for the Architect-Engineer Contract Administration Support System (ACASS) and the firm number for any consultants in block 6 of the SF 255. If unknown, so state. To receive information to obtain an ACASS number, call (503) 326-3459. Personal visits for this solicitation to the Omaha District offices or the project site will not be scheduled. Administrative and procedural questions shall be directed to John M. Miller at (402) 221-4176. See Numbered Note(s): 24. (0067)

ARCHITECT-ENGINEER SERVICES FOR PREPARATION OF AN RFP PACKAGE FOR DESIGN OF AN EDUCATION CENTER AT FORT CAMPBELL, KENTUCKY POC

Contact Mrs. Robin Woodruff, (502) 582-5598 1. CONTRACT INFORMATION: The proposed services will be obtained by a negotiated Firm Fixed Price Contract. The estimated construction cost is over \$10,000,000.00. Estimated starting and completion dates are September 1994 and March 1995, respectively. 2. PROJECT INFORMATION: The project consists of an Education Center with 50 classrooms. The center will have laboratories for each of the following disciplines: computer science, biology, chemistry, physics, geology and languages. The center also includes a standby generator, **offices** for faculty and staff, learning center/library, testing facility, **pre - wired** work stations, and vocational technology center. The facility shall have state-of-the-art communications technology: fiber-optic cable, **satellite** receiving and transmitting, interactive television programming, modems, and interaction between university, college, and Fort Campbell education center's computer systems. The center shall include paving, walks, curbs, gutters, storm drainage and site improvements. The Comprehensive Interior Design shall be prepared. The design shall be prepared to the thirty-five percent design stage and developed into a

Request For Proposal(RFP) package. The RFP will be used later by the Government to procure a design/build contract for the project. The firm selected to prepare the RFP will not be permitted to submit a proposal for the design/build project. 3. SELECTION CRITERIA: Submittals will be evaluated against the general evaluation factors listed in Note 24 in descending order of importance. Additional specific evaluation criteria is provided as follows. Experience in the design of school facilities and preparation of RFP packages will be considered during the selection process. Design and/or review of design by registered professionals in the fields of Architecture, Civil, Structural (independent of the Civil), Mechanical and Electrical is required and must be indicated by resumes in the SF 255. Firms should indicate two architects or engineers in each field; at least one must be a registered professional. Firms shall indicate how life safety and fire protection will be addressed. The use of the SPECSINTACT system is encouraged for preparation of specifications. Construction cost estimating shall be accomplished using the Micro-Computer Aided Cost Estimating System (M-CACES) software. The MS-DOS compatible M-CACES software and database will be furnished. In addition to drawing plots, the final drawings must be submitted as Intergraph Microstation drawing files. Each SF 255 must include a description of a formalized Quality Control (QC) Plan relating to design and specifically tailored to this work. The QC Plan will explain how the firm and all subcontractors will produce a quality design which is free of errors and omissions. The QC Plan will be considered as part of the evaluation factor relating to past performance. This project may be partnered. 4. SUBMITTAL REQUIREMENTS: a. See Note 24 for general submission requirements. Firms which are interested and meet the requirements described in this announcement are invited to submit one completed SF 255, U.S. Government A/E and Related Services for Specific Projects to the office shown above. All responses on SF 255 to this announcement must be received no later than 4:30 pm Local Time on the 30th calendar day after the date of this publication to be considered for selection. The day following this CBD announcement counts as day number 1. If the 30th day falls on Saturday, Sunday or a U. S. Gov't. holiday, the deadline is the close of business on the next Gov't. business day. b. It is requested that interested firms list the fee amount and date of all DOD contracts awarded during the last 18 months to the firm and all subsidiaries in Block 9 of the SF 255. c. Responding firms must submit a current and accurate SF 254 for each proposed consultant. Additionally, all responding firms which do not have a current (within the past 12 months) SF 254 on file with the North Pacific Division, Corps of Engineers, must also furnish a completed SF 254. The business size status (large, small and/or minority) should be indicated in Block 3 of the SF 255. Definition: A concern is small if the annual receipts averaged over the past 3 fiscal years do not exceed \$2.5 million. d. No other information including pamphlets or booklets is requested or required. e. No other general notification to firms under consideration for this project will be made and no further action is required. Solicitation packages are not provided for A/E contracts. This is not a request for proposals. (0167)
